SUMMARY

Software Engineer with 6+ years of professional experience building high-throughput distributed systems across fintech and healthcare. Delivered platforms processing 25M trades/day and built healthcare services supporting 10,000+ daily hospital workflows. Skilled in building cloud-native microservices using .NET, AWS, Kafka, Snowflake, and PostgreSQL, with a focus on scalable event-driven architectures, performance optimization, and AI-assisted engineering.

SKILLS

Languages: C#, SQL, TypeScript, Python
Backend & Architecture: .NET, REST APIs, Microservices, Event-Driven Architecture
Databases & Messaging: Kafka, PostgreSQL, SQL Server, Snowflake, Redis
Cloud & DevOps: AWS, Azure DevOps, Docker, TeamCity, Octopus
Frontend: Angular, Vue.js
Testing & Automation: MSTest, SpecFlow, Selenium, Jasmine
AI Engineering & Tools: AWS Bedrock, Claude Code, GitHub Copilot, Glean Agent Builder

EXPERIENCE

Software Engineering Consultant (via Drepp) | Millennium Management | Sep 2025 – Present

- Architected T0 real-time and T1 batch reporting microservices processing 25M trades/day using .NET, Angular, Kafka, PostgreSQL, Snowflake and Redis.
- Optimized Snowflake clustering and query execution, reducing query latency by 83% from 60 seconds to 10 seconds.
- Engineered a high-throughput transaction import/export platform supporting 1M-record transfers in under one minute.
- Migrated approximately 10 TB/day of log data from Athena to Snowflake, consolidating log analytics workflows and optimizing data access and AWS costs.
- Built Angular interfaces for MiFID and MAS reporting and streamlined TeamCity/Octopus CI/CD pipelines; implemented Kibana dashboards and Slack alerts for operational monitoring.
- Integrated Claude and Qodo into GitHub workflows for AI-assisted code reviews, with adoption across 15+ repositories.

Senior Analyst – Software Engineering | Nasdaq | Dec 2024 – Jul 2025

- Engineered and enhanced 7+ .NET microservices within the distributed eVestment platform, using Vue.js for UI development.
- Designed AWS-backed data processing pipelines and SQL Server workflows to automate product-data population and completeness tracking across institutional investment databases.
- Integrated Salesforce CRM with Omni data pipelines to synchronize information across business units, speeding up data enrichment by ~80%.

Engineer – Design & Development | Siemens Healthineers | Sep 2020 – Nov 2024

- Developed and maintained On-Screen Display .NET Core REST microservices with MySQL and NHibernate supporting 10,000+ daily hospital workflows.
- Owned the Position List Editor subsystem and delivered three product improvements that were adopted into production.
- Built Azure DevOps CI/CD pipelines with automated quality gates and Azure Functions to streamline delivery and reporting.
- Automated testing with Selenium, SpecFlow, MSTest, and Jasmine with 99% line coverage.
- Built Power BI reporting dashboards and Azure Analytics Views adopted by 15+ teams.
- Attained Level 3 in the Code, Test, and System Craftsmanship program, a rigorous engineering competency assessment.

Intern | Siemens Healthineers | Jan 2020 – May 2020

- Automated 35+ OnScreen Display and CELoader clinical workflows using C#, Python and Selenium, reducing testing efforts from 2 days to 3 hours.

PROJECTS

Millennium Treasury - Payment Reconciliation AI Agent | Built an AI-assisted reconciliation workflow with Glean Agent Framework and Microsoft Graph to process 100+ treasury emails daily, saving 2–3 hours of manual effort per day.
Nasdaq InsightGen | Built an MCP-style developer assistant integrating GitHub, Jira and Confluence through Copilot Studio, accelerating engineering knowledge discovery.
Voter CRM | Developed analytics platform for 20M+ Telangana voter records using Python, Flask, Streamlit and Docker, which was adopted by IIIT-H for 2023 assembly election analysis.

EDUCATION

Post Graduate Certificate in Software Engineering for Data Science | IIIT Hyderabad | 2022-2023 | 98.5%
B.E. Electronics & Communication | JSS Science and Technology University | 2016-2020 | CGPA 9.13

CERTIFICATIONS

AWS AI & ML Scholars Program, Microsoft Learn AI Skills Challenge, Claude Code 101, AI Fluency: Framework & Foundations

PUBLICATIONS

Indoor Navigation Assistant for Visually Impaired| International Conference on Communication, Computing and Electronics Systems | DOI: 10.1007/978-981-33-4909-4_17

ACHIEVEMENTS

DAQ – Act as an Owner, Nasdaq (2025) | Star of the Sprints, Siemens Healthineers (2024)
Winner – IIIT-H PGCSEDS Hackathon (2022) | Finalist – HackerEarth Aerothon (2022)
