PROFILE SUMMARY

A results-oriented product professional with five years of experience in developing accessible, human-centered products with proven ability to drive innovative solutions through a collaborative approach, strong sense of responsibility, and meticulous attention to detail.

SKILLS

- Languages: C#, Python, Javascript, Typescript
- Backend: .NET Core/Framework, LINQ, REST, EF
- Frontend: Angular (v8 - 17), Vue.js
- Cloud & Devops: AWS, Azure DevOps, Docker
- Database: MySQL, SQL Server, MongoDB
- Testing: MsTest, Selenium, SpecFlow, Jasmine
- Tools & Methodologies: Git, TFS, Agile, SAFe, BDD

EDUCATION

Post Graduate certificate in Software Engineering for Data Science, 2022 - 2023
International Institute of Information Technology, Hyderabad

Bachelor of Engineering In Electronics and Communication, 2016 - 2020
JSS Science and Technology University, Mysuru
CGPA: 9.13/10

PUBLICATIONS

Indoor Navigation Assistant for Visually Impaired
International Conference on Communication, Computing and Electronics Systems.
https://doi.org/10.1007/978-981-33-4909-4_17

SPECIALIZATIONS AND CERTIFICATIONS

- Data Structures & Algorithms Udacity
- Foundations of Front-End Web Development Udemy
- AWS DevOps Pro: Mastering CI/CD Pipelines Skillsoft
- Secure Coding Code Bashing
- AI on cloud Great Learning
- Scrum Product Owner Skillsoft
- Deep Learning Specialization Coursera
- IoT and Embedded Systems Workshop Keonics

EXTRA CURRICULUM

- Awarded 'DAQ - Act as an Owner' by Nasdaq and 'Star of the Sprints 2024' by Siemens for professional impact.
- Winner: IIITH, PGCEDES Hackathon (2022).
- Finalist: Hackerearth Aerothon (2023).
- Top 10: Nasdaq Hackwave (2025).
- SHPL 'Leadership Launchpad' program alum.
- Mentored by Agile coaches & senior PMs in process/product management.
- Volunteer: 'Save The Child', 'Project Rise' NGO 2018-20.
- Affiliate: SHPL Veteran ERG 2022-24, Nasdaq SEEN 2025.
- Served as school head and college head.

WORK EXPERIENCE

Senior Software Engineer, Nasdaq

December 2024 - July 2025

Project: OMNI

- Worked on eVestment OMNI microservice, leveraging a .NET server integrated with a SQL Server database, a Vue.js front-end, deployed on AWS cloud infrastructure.
- Engineered and maintained other 5+ microservices, enabling seamless feature rollouts and improving service isolation.
- Containerized microservices using Docker, accelerating development environments and reducing onboarding/setup time by ~90%.
- Integrated services with Salesforce CRM, enabling real-time data syncing.

Design And Development Engineer, Siemens Healthineers

September 2020 - November 2024

Project: OnScreen Menu Configurator

- Contributed to the development of a .NET microservice following REST methodology with MySQL integration using Fluent NHibernate, handling ~10K+ daily database transactions.
- Utilized LINQ for efficient data querying, applying SOLID principles and design patterns across 20+ core classes, enhancing scalability and maintainability.
- Automated server and client SSIT using .NET, Selenium, and SpecFlow (BDD), reducing manual test effort by ~80% and accelerating release cycles.
- Designed Azure CI/CD build & test pipelines, ensuring nightly builds.
- Performed Server Unit testing using MsTest, Client Unit testing using Jasmine.
- Implemented modular client architecture using Angular (ver.8 - ver.15)
- Used Scaled AGILE methodologies during development.

Project: Position List Editor

- Subsystem Product Owner - Managed product backlog with 50+ user stories and refined scope with UX/QT collaboration.
- Used the NgRx library with Angular for client state management.
- Automated client SSIT, increasing coverage by 95% and improving regression stability.
- Proposed 3 innovative ideas that are now integrated into the product.
- Mentored team by conducting workshops and knowledge transfer sessions.

Project: OnScreen Display

- Spearheaded the migration of legacy UI to a more modular design, improving brand appeal.
- Helped in resolving 25+ defects, significantly boosting release confidence.

Intern, Siemens Healthineers

January 2020 – May 2020

- Automated ~35 On Screen display subsystem workflows using C#, Python and Selenium, reducing manual testing efforts from around 3 days to 3 hours.

OPEN SOURCE PROJECTS

Voter-CRM: Web app for IIITH's Voter CRM Project. Tech & Tools: AWS, Ubuntu, REST.

unfold: An open-source full-stack code generator. Tech & Tools: Angular, MySQL.

best: Minimal UI for curated English song lyrics. Tech & Tools: Angular.

Explainable AI using H2O: Tech & Tools: Python, H2O, Kaggle

Breast Cancer Type Prediction: Tech & Tools: Python, docker

Agile Project Management Dashboard: Tech & Tools: Azure Analytics View, Power BI
