PROFILE SUMMARY

A results-oriented product professional with five years of experience in developing accessible, human-centered products with proven ability to drive innovative solutions through a collaborative approach, strong sense of responsibility and meticulous attention to detail.

SKILLS

- Languages: C#, Python, Javascript, Typescript
- Backend: .NET Core/Framework, Entity Framework, REST, LINQ, Kafka, Microservices
- Frontend: Angular (v8 - v17), Vue.js
- Cloud & Devops: AWS, Azure DevOps, Docker, Octopus
- Database: MySQL, SQL Server, MongoDB, PostgreSQL
- Testing: MsTest, Selenium, SpecFlow, Jasmine
- Tools & Methodologies: Git, TFS, Agile, SAFe, TDD, DDD

EDUCATION

Post Graduate certificate in Software Engineering for Data Science, 2022 - 2023
International Institute of Information Technology, Hyderabad

Bachelor of Engineering In Electronics and Communication, 2016 - 2020
JSS Science and Technology University, Mysuru
CGPA: 9.13/10

PUBLICATIONS

Indoor Navigation Assistant for Visually Impaired
International Conference on Communication, Computing and Electronics Systems.
https://doi.org/10.1007/978-981-33-4909-4_17

SPECIALIZATIONS AND CERTIFICATIONS

- Backend Development Path [Scrimba](#)
- Data Structures & Algorithms [Udacity](#)
- Foundations of Front-End Web Development [Udemy](#)
- AWS DevOps Pro: Mastering CI/CD Pipelines [Skillsoft](#)
- Secure Coding [Code Bashing](#)
- AI on cloud [Great Learning](#)
- Deep Learning Specialization [Coursera](#)
- IoT and Embedded Systems Workshop [Keonics](#)

EXTRA CURRICULUM

- **Awarded** 'DAQ – Act as an Owner' (Nasdaq) and 'Star of the Sprints 2024' (Siemens) for professional excellence.
- **Winner:** IIITH PGCESEDs Hackathon (2022).
- **Finalist:** Hackerearth Aerothon (2023).
- **Top 10:** Nasdaq Hackwave (2025).
- **Alumnus:** SHPL *Leadership Launchpad* program; mentored by Agile coaches & senior PMs.
- **Volunteer:** *Save The Child* & *Project Rise* NGOs (2018–2020).
- **Affiliate:** SHPL Veteran ERG 2022-24, Nasdaq SEEN 2025.
- Served as school head and college head.

WORK EXPERIENCE

Software Engineering Consultant, Millenium Management

22/09/2025 - Present

Project: Regulatory Reporting

- Building regulatory reporting microservices using **.NET, Angular, Kafka** and **PostgreSQL**, with **AWS** cloud deployment and **TeamCity** CI/CD integration.

Senior Analyst - Software Engineering, Nasdaq

02/12/2024 - 31/07/2025

Project: Nasdaq eVestment Omni

- Developed and maintained eVestment Omni and 5+ **.NET** microservices with **SQL Server, Vue.js**, and **AWS**.
- Containerized services with **Docker**, reducing setup time by ~90%.
- Integrated systems with **Salesforce** CRM for real-time data synchronization.

Engineer - Design & Development, Siemens Healthineers

28/09/2020 - 28/11/2024

Project: OnScreen Menu Configurator

- Developed a **.NET REST** microservice with **MySQL** and **Fluent NHibernate**, handling **10K+ daily transactions**.
- Applied **LINQ, SOLID** principles, and design patterns across **20+ core classes** to improve scalability and maintainability.
- Automated **server/client SSIT** using **.NET, Selenium**, and **SpecFlow (BDD)**, cutting manual testing by ~80% and accelerating release cycles.
- Built **Azure CI/CD** pipelines for automated builds and nightly test runs.
- Wrote Server **Unit tests** with **MsTest**, Client Unit tests using **Jasmine**.
- Used **Scaled AGILE methodologies** during development.

Project: Position List Editor

- **Subsystem Product Owner** - Managed product backlog and refined scope in collaboration with UX/QT teams.
- Implemented **state management** using **NgRx** with **Angular**.
- Automated **SSIT**, increasing coverage to **95%** and improving regression stability.
- Proposed **3 product innovations** adopted into production.
- Mentored team through workshops and knowledge-sharing sessions.

Project: OnScreen Display

- Led legacy UI migration to modular SHUI design, boosting brand appeal.
- Helped in resolving 25+ defects, significantly boosting release confidence.

Intern, Siemens Healthineers

20/01/2020 – 31/05/2020

- Automated ~35 On Screen display subsystem workflows using **C#, Python** and **Selenium**, reducing manual testing efforts from around 2 days to 4 hours.

OPEN SOURCE PROJECTS

Voter-CRM: Web app for IIITH's Voter CRM Project. Tech & Tools: AWS, Ubuntu, REST.

unfold: An open-source full-stack code generator. Tech & Tools: Angular, MySQL.

best: Minimal UI for curated English song lyrics. Tech & Tools: Angular.

Explainable AI using H2O: Tech & Tools: Python, H2O, Kaggle

Breast Cancer Type Prediction: Tech & Tools: Python, docker

Agile Project Management Dashboard: Tech & Tools: Azure Analytics View, Power BI
